

HOCL

- HOCL is nature's oldest disinfectant.
- 100% safe for humans, chemical free and non-toxic.
- At least 80 times more powerful than bleach, yet it's non-staining and non-corrosive.
- Produced in our white blood cells to boost our immune system to fight off infections.
- It can be used as hand sanitizer with no skin irritation. It delivers a more powerful punch than alcohol sanitizers.
- Kills bacteria, fungus, spores and viruses.
- FDA approved for use in wound healing, wound care and eye care products and is also common in veterinary care products.
- USDA approved for use in organic crop production.
- FDA approved for fish, seafood, meat, poultry, fruits and vegetables as a no rinse sanitizer.

HYPOCHLOROUS ACID
